### GE Intelligent Platforms

# Series 90\*-30 PLCs

GE Intelligent Platforms' Series 90\*-30 PLCs is a family of controllers, I/O systems and specialty modules designed to meet the demand for versatile industrial solutions — helping businesses gain a sustainable advantage. With its single overall control architecture, the Series 90-30 has been the PLC of record in over 200,000 applications such as highspeed packaging, material handling, complex motion control, water treatment, continuous emissions monitoring, mining, food processing, elevator control, injection molding and many more.

# Its modular design offers unique versatility.

Configure just the system you need, saving critical space and reducing cost. With over 100 I/O modules, the Series 90-30 PLC can be adapted to a wide range of applications.

- Digital interfaces for push buttons, switches, proximity sensors, relays, contactors and many other devices
- Analog modules with varying degrees of resolution for flow, temperature or pressure applications
- Direct connect wiring or remote termination
- Local or remote I/O systems

#### Ethernet communications provide a real-time link between the plant floor and the boardroom.

You can begin with an Ethernet-enabled CPU, or at a later date, choose from our selection of rack-mounted Ethernet modules. The Series 90-30 Ethernet module supports both SRTP and Modbus TCP/IP application protocols.

# The scalable processing power of the CPU creates a clear upgrade path.

Create the system that's ideal today, while leaving open the option of creating a more powerful system tomorrow — without having to change your application software.

#### Integrated motion control fosters high performance, point-to-point applications.

A variety of Series 90-30 field bus interfaces enables distributed control and/or I/O. Choose from Ethernet EGD, Profibus-DP™, Genius\*, DeviceNet<sup>™</sup> and Interbus-S<sup>™</sup> modules. Field Bus interface modules are easy to install and quick to configure. Plug them into an existing system or design a new system around them.

#### Programming is easy with Proficy\* Machine Edition.

With the most advanced PLC programming tools on the market today, Proficy Machine Edition is an integrated solution for PLC and remote I/O hardware configuration, PLC programming languages, application development, and on-line diagnostics. Supported programming languages include Ladder Diagram (LD), Instruction List (IL), Structural Text (ST), and C Block.

#### The Series 90-30 stands out among small controls for offering redundancy options.

The Series 90-30 is the low-cost solution for high availability applications, with redundant CPUs and power supplies.
